

BAD - Fairer Mining Concessions in Africa- how can this be achieved

Soumis par CDC-mHAMZA le 04/12/2013

Ousman Gajigo, Emelly Mutambatsere and Guirane Ndiaye1

Key Issues

- Mining is an important sector in Africa.
- The sector's potential contributions to development are high but not always realized due to limited government revenues from concessions.
- A fairer sharing of resource rents that increases government shares and allows investors to realize reasonable returns is necessary for the sector to better contribute to development.
